

# Triton SL

## Versatile, High-performance Self-filling Steamer

Triton SL is a rugged, wet and dry steam cleaner for degreasing frames, removing wax and polishing residues, as well as cleaning impression trays and models. Direct water connection for continuous, non-interrupted use.

## Features

### Versatile Performance

- Conveniently choose between wet (additional hot water flow) and dry steam modes.

### Reliable Operation

- Safety trigger prevents unintentional spray gun discharge.
- Maintains constant pressure of about 45 psi at 270° F.
- Stainless steel tank helps prevent corrosion.

### Direct Water Connection

- Direct water connection for continuous non-interrupted use.
- Full demineralization cartridge ensures optimum operation. (Additional Accessory)
- Countertop sensor automatically terminates water supply if leaks are detected.

### Specifications

Height .....	21"
Width .....	15"
Depth .....	11"
Rated Voltage .....	110 Volt
Boiler Temperature @ 45 psi .....	271°F
Steam Pressure .....	45 psi
Water Connection .....	3/4" standard thread
Weight .....	29 lbs
Warranty .....	Limited 2 Year

### Calex

Demineralizing solution to breakdown mineral build-up inside of the steamer.

### Full Demineralization Cartridge

Removes most minerals before they enter the Triton SL to maximize longevity and performance.
